

## YOKOMO NEW PRODUCT RELEASE

Perfect for those who would like R/C drift, but are looking for an easier way to get started

# DRIFT PACKAGE DRIFT RACER

The ready-to-drift (RTD) DRIFT RACER chassis set features a factory pre-assembled chassis with radio electronics pre-installed.

The DRIFT RACER is designed as a component of a set to allow easier customization. Both the body shell and wheels (with pre-mounted tires) are not included. To complete the set, purchase separately the body shell and set of wheels (with pre-mounted tires) of your liking. (Pre-painted, pre-finished bodies are scheduled for release soon.)

### Included Items

- Drift Specific SD CMS Pre-Assembled Chassis\*
- AM27MHz Radio Set (01~12 Narrow Band)
- Speed Controller SCR-6712 (12T Compatible)
- High Torque 35T Drift Motor
- Rechargeable 1400mAh NiCd Battery

\*Specifications of the included CMS chassis differ slightly from the one included in the DRIFT PACKAGE unassembled kit. Front and rear spools (solid axle) replace the differentials to enhance performance, and smooth-action friction dampers are used to reduce maintenance and adjustability for easier use. The entire line-up of option parts for the DRIFT PACKAGE are available for the user looking to upgrade.

\*Body shell, wheels (with pre-mounted tires), 8 AA-size batteries (for transmitter) all sold separately.

**DRIFT RACER PRE-ASSEMBLED CHASSIS ¥28,500** (LIST PRICE)
